

VINR Skincare 3D Modeling

Project : VINR Skincare 3D Modeling

VINR is a high-performance skincare brand focusing on active ingredients like Vitamin C, Retinol, and Niacinamide. For this project, I was tasked with creating a 3D visual identity that communicates both clinical effectiveness and luxury. The goal was to provide a realistic digital twin of the physical packaging for marketing and e-commerce use.

Client : VINR

Service : 3d Modling and Branding
