

Global Sports Mobile App UI/UX Design

Project : Global Sports App Design

Global Sports is a modern sports networking and athlete community platform designed to connect athletes, coaches, scouts, and trainers worldwide. For this project, I was responsible for creating the complete mobile app UI/UX design including onboarding screens, social networking features, athlete profiles, training content layouts, event systems, and modern sports branding visuals.

Client : Global Sports
Service : UI/UX Design and Mobile App Branding
